software for engineering, architecture, 3D modeling, web engineering, and animations, and is often bundled with products from other companies such as Autodesk's AutoCAD Software Suites or Autodesk Architectural Visualization Solutions. Thanks for viewing AutoCAD - CAD and D&D enthusiasts with an interest in AutoCAD have

---

selected it as the best CAD software! Here are the reasons why: Amazing community: AutoCAD has one of the most active and helpful technical communities online and is definitely among the most popular CAD applications. .NET: The .NET scripting language has been integrated into AutoCAD. NET was developed by Blue River Technology, which later became Autodesk and the .NET language was subsequently withdrawn from general distribution by Autodesk, in 2006, and is now available as an extension for AutoCAD 2009 and 2010. NET

---

is being used to support scripting and extend CAD applications with the AutoLISP extensions, due to their ability to be interpreted in a non-Microsoft Windows environment.

AutoCAD does not allow the extension of any.NET language into AutoCAD. Products
